Sparse — CPU / Atomic / RR128 (56 graphs)
CPU (previous)
Atomic (previous)
RR128 (EX2)
Total compute, input to CPU coordinates (s)
Number of vertices |V|
CPU/Atomic: previous v5; RR128: EX2. Different sessions; GPU timestamps enabled only for EX2 RR.
Points: median of 5 seed medians (3 repeats/seed); whiskers: min–max of those 5 medians, not confidence intervals.
